

IPO Chart

Input	Process	Output
User clicks navigation links	Verify all navigation links (Home, About Us, Services, News, Contact Us)	Correct page loads with expected content and structure.
User submits "Job seekers"	Validate form fields (personal details, job details, sector) and submission flow.	Redirect to a success page.
User searches for jobs	Verify navigation link(Tourism→Read More)	Relevant job listings are displayed.
User clicks "Read more" links	Links expand/collapse additional content or redirect correctly.	Expanded content or redirected page matches the linked section.
User views testimonials	Verify testimonials (Mila, Marko, Ivan, Mia) are displayed and formatted.	Testimonials appear with correct text, names, and layout.
User checks contact details	Validate consistency of phone numbers, emails, and addresses across pages.	All contact details match (e.g., +7 705 8297239, nurblata811@gmail.com)
User applies for a job	Test "APPLY NOW" buttons and form validation (e.g., required fields).	Application form opens; errors shown for invalid inputs.
User views work permit info	Verify the accuracy of legal requirements (e.g., document lists and ratios)	Content aligns with described processes (e.g., 70% local employees).
User tests social media links	Check if "Visit My Instagram/Facebook/LinkedIn" links are functional.	Redirects to correct social media profiles
Mobile responsiveness	Test layout on different screen sizes (desktop, laptop).	Content adjusts without overflow or misalignment.

Test Cases Table

Test Case ID	Description	Steps	Expected Result	Actual Result	Status
TC-01	Verify Home Page content	1. Open Home Page. 2. Check testimonials, sectors, and the "Post a vacancy" button.	All sections load correctly; no broken images or text overlaps	Pass	Pass
TC-02	Validate navigation links	1. Click each navigation link (Home, About Us, etc.).	Correct page loads with consistent header/footer.	Pass	Pass
TC-03	Test "Job Seekers" form submission	1. Click "Job Seekers". 2. Submit empty form.	Error messages prompt the user to fill in the required fields.	N/A (Wireframe)	Pending
TC-04	Check contact info consistency	1. Compare contact details across pages.	All emails and phone numbers match (e.g., nurblata811@gmail.com).	Pass	Pass
TC-05	Verify job search functionality	1. Enter "Travel Agent" in the search bar. 2. Click "Search".	Relevant jobs (e.g., "Travel Agent - Amadeus Specialist") appear.	Fail**	Fail
TC-06	Validate work permit documentation	1. Navigate to the Work Permit section. 2. Check document requirements.	The requirements list matches the Page 8 content (e.g., university degree with apostille).	Pass	Pass
TC-07	Test "APPLY NOW" buttons	1. Click "APPLY NOW" on a job listing.	The application form opens with name, email, and resume upload fields.	N/A (Wireframe)	Pending
TC-08	Validate computer and laptop responsiveness	1. Resize browser to computer and laptop view. 2. Check layout.	Content adapts without overlapping elements.	Pass	Pass
TC-09	Verify "Request a call" functionality	1. Click "Request a call". 2. Enter phone number and submit.	A confirmation message appears; phone number format validated.	N/A (Wireframe)	Pending

Code Validation Report: Nurshuak Recruitment Agency Website

Validation Tools Used

HTML Validation: W3C Nu HTML Checker

CSS Validation: W3C CSS Validation Service

For the HTML errors:

1. **<h> tag misuse**: I used `<h>` which isn't a valid HTML tag. They should use `<h1>` to `<h6>` for headings.
2. **Duplicate class attributes**: Having class attributes repeated in a single tag is invalid. They need to merge them into one class attribute.
3. **Trailing slashes in tags**: In HTML5, self-closing tags like `` don't need the trailing slash. So `` should be ``.
4. **<video> tag issues**: Using both `src` attribute and `<source>` children is incorrect. They should remove the `src` attribute from `<video>` and only use `<source>` tags inside.
5. **Unclosed tags**: Missing closing tags can break the structure. Need to ensure all tags are properly closed.
6. **Heading structure**: Headings should be nested correctly (e.g., `<h1>` followed by `<h2>`, not skipping levels).

CSS Validation Findings

Common Errors:

Missing semicolons (;).

Invalid property values (e.g., `font-size: 12` instead of `12px`).

Deprecated properties (e.g., `center` instead of `text-align: center`).
